Premium Crops trial seed is supplied on the strict understanding that the seed will only be used for research and development trials and not for further multiplication.

The seed supplied has been developed from material that does not contain any genetic modification and has been produced in an environment free from GMO's. To the best of our knowledge seed is GM free but Premium Crops Ltd will not guarantee this to be the case and cannot accept any liability for seed that is subsequently shown to contain genetically modified material.

For details of our other Terms and Conditions please see our website:
